FILLERS.COM

COMPLETE LIQUID PACKAGING SYSTEMS

Over 700 Designs of Both Standard and Unique Packaging Solutions

- **INTELLIGENCE IN DESIGN:** Our application-specific designs of world class liquid filling machines, capping machines, and labelers optimize bottling operations of speeds up to 150 bottles per minute. With over 700 designs of both standard and unique packaging solutions, our range of product choices ensures a smart fit to your needs.
- **INTEGRITY IN BUSINESS:** Our promise to deliver a quality working system is simple and honest. We are the only reputable manufacturer in our industry that offers both an unconditional 30 day performance guarantee and 5 year limited warranty on every machine we manufacture. Make no mistake about it: an offer to be "free of manufacturing defects" is simply NOT a warranty for fitness of purpose. Inline Filling Systems' performance guarantee takes no chances with your livelihood or your career.
- **INVESTMENT IN SERVICE AND SUPPORT:** Our filling lines are manufactured and supported not only from our Florida factory but also through local service facilities coast to coast. Additionally, Inline Filling Systems offers our customers the highest ratio of technical support personnel to installed base in the industry. Simply put, we have the resources to deliver what we promise. When you call our factory with a technical question about the care and maintenance of your machines, the first person you speak to is a member of that product's original design team! Nothing in the realm of technical support trumps continuity of experience and sufficient personnel for the job.
- **A HISTORY OF STABILITY AND SUCCESS:** We are the culmination of decades of applications, engineering and manufacturing experience serving the most technically demanding industries. With over \$100MM of installations worldwide, Inline Filling Systems has a proven reputation for technical expertise and highly reliable equipment. Our equipment is made in the USA; we are not just another website reselling equipment made by others or overseas manufacturers.
- **MAKE THE INTELLIGENT CHOICE:** Our unique history and technical qualifications make Inline Filling Systems, Inc your best alternative for project management with a worry-free result. Assure your path to profits by trusting the best company for your challenge: Inline Filling Systems.
